

FPC-12504 - QUICK PLUG

HARDWARE FEATURES

Enclosure:

- IP54 weatherproof rating
- Polycarbonate
- Mounting brackets included

Protection:

- Low voltage control and input circuitry
- No hard wiring needed

Control & interface:

- Indicator lights for power on and pump run

Inputs:

- Single phase (230Vac) power supply
- 2x 15Vdc quick plug inputs for start and stop level float switches

Outputs:

- GPO power supply to pump (6 Amps max)

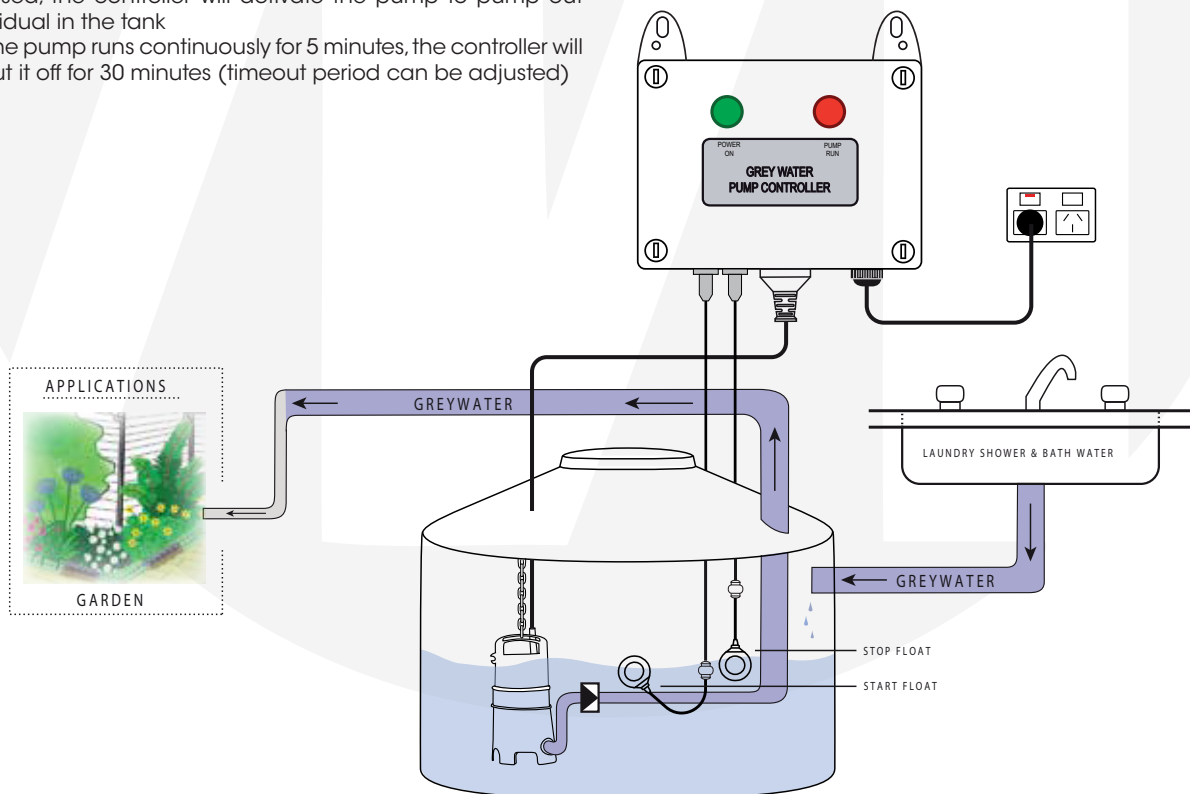

Included with panel:

- 10 Amp 3 pin 1.5m power supply lead
- 2x 9006 float switches with 2.5m cable and quick plug connectors

FUNCTION FEATURES

- When the pump start input closes, the controller will activate the indicator light and the pump, pumping grey water out of the tank to selected outlets, until the pump stop input opens
- If the pump has not run for 24 hours and the stop input is closed, the controller will activate the pump to pump out residual in the tank
- If the pump runs continuously for 5 minutes, the controller will shut it off for 30 minutes (timeout period can be adjusted)

QUICK PLUG GREY WATER PUMP CONTROLLER
