

FPC-12704 - DUAL FOUR LEVELS

MATElec Australia's Tank Level Indicators are designed to provide accurate and informative indication of tank water level. Housed in a robust powder coated metal enclosure, the dual four levels version features inputs and indicator lights for 4 float switches in two tanks.

HARDWARE FEATURES

Enclosure:

- IP54 rated, powder coated mild steel enclosure with removable gland plate

Protection:

- Low voltage control and input circuitry
- Din rail mounted terminal connections

Control & interface:

- Indicators lights for 4 levels (25%, 50%, 75% & 100%) in tank 1 and 2

Inputs:

- Single phase (230Vac) power supply
- 8x digital 24Vac inputs for 4 float switches per tank

Outputs:

- 8x BMS volt free outputs for 4 levels (25%, 50%, 75%, 100%) from tank 1 and 2

Included with panel:

- 10 Amp 3 pin 1.5m power supply lead
- 8x 9004 float switches with 10m cable

FUNCTION FEATURES

- Provides indication of four levels within two tanks
